GOALS & OBJECTIVE

The Objects for which the foundation is established are to promote information technology infrastructure development through inspiring and engaging communities into practical IT operations both on small and wide scale.

To establish, advocate, provide, promote, assist and conduct or otherwise subsidize research laboratories, experimental stations, workshops and libraries for scientific, industrial and technical research and experiments; to undertake and carry on scientific, industrial, economic, statistical and technical research, surveys and investigations; to promote studies, research investigation and invention, both scientific and technical by providing, subsidizing, endowing, or assisting laboratories, colleges, universities, workshops, libraries, lectures, meetings, exhibitions and conferences and by providing for the remuneration to scientists, scientific or technical professors or teachers and the award of scholarship, grants and prizes to students, research-workers and inventors or otherwise and generally to encourage, promote and reward studies, research, investigations, experiments, tests and inventions of any kind.

To subscribe or contribute or otherwise to assist or to guarantee money to charitable, benevolent, religious, scientific, national, public or any other useful institutions, objects or purposes or for any exhibition.

To establish information technology schools/institutes serving similar objectives to those of the foundation enabling kids, youth and adults have free access to basic knowledge about technology

To establish or support any charitable body formed for all or having similar objectives to those of the foundation;

To help information technology companies achieve the maximum from their I.T. investment.

To advocate, maintain, conduct, provide, procure or make available services of every kind including promotion, statistical, financial, accountancy, medical, legal, management, educational, engineering, data processing, communication and other technological social or otherservices.

The following images are not ours, but we have used them to explain our intentions towards establishing a Centre

About the Project

PROJECT NAME: CENTRE FOR TECHNOLOGY (CFT)

This project is under our program (Tech Knowledge for all), the project is intended to establish a medium safe permanent place herein called the Centre for technology (CFT) which will help the less privileged kids, youth and adults to exercise, socialize, and acquire free access to basic information technology skills that will be useful throughout their lives and also to further the development of technology at a grass root level.

This Centre will also serve as an office, internet café, training ground, IT consultancy access point, IT equipment distribution access point, service delivery access point and advertisement access point. Our foundation is dedicated to the process of making that happen but we need your help.

The Centre will be established along Kireka, Jinja - road Kampala. We are a newly established IT foundation in Uganda formed to serve and promote information technology infrastructure development. INCVIT FOUNDATION kindly requests a donation of \$14,483 to establish a Centre and carry on its activities towards achieving its primary goal.

The project objectives are:

To introduce new technologies and software to the general public.

To teach, support and supervise communities volunteer peer educators (VPEs) and others

To provide free access to basic information technology skills

To promote the development of technology on international basis

To support the people, improve their livelihood opportunities and options through learning Institutions and Income Generating Activities

OUR REQUEST

TO THE DONOR

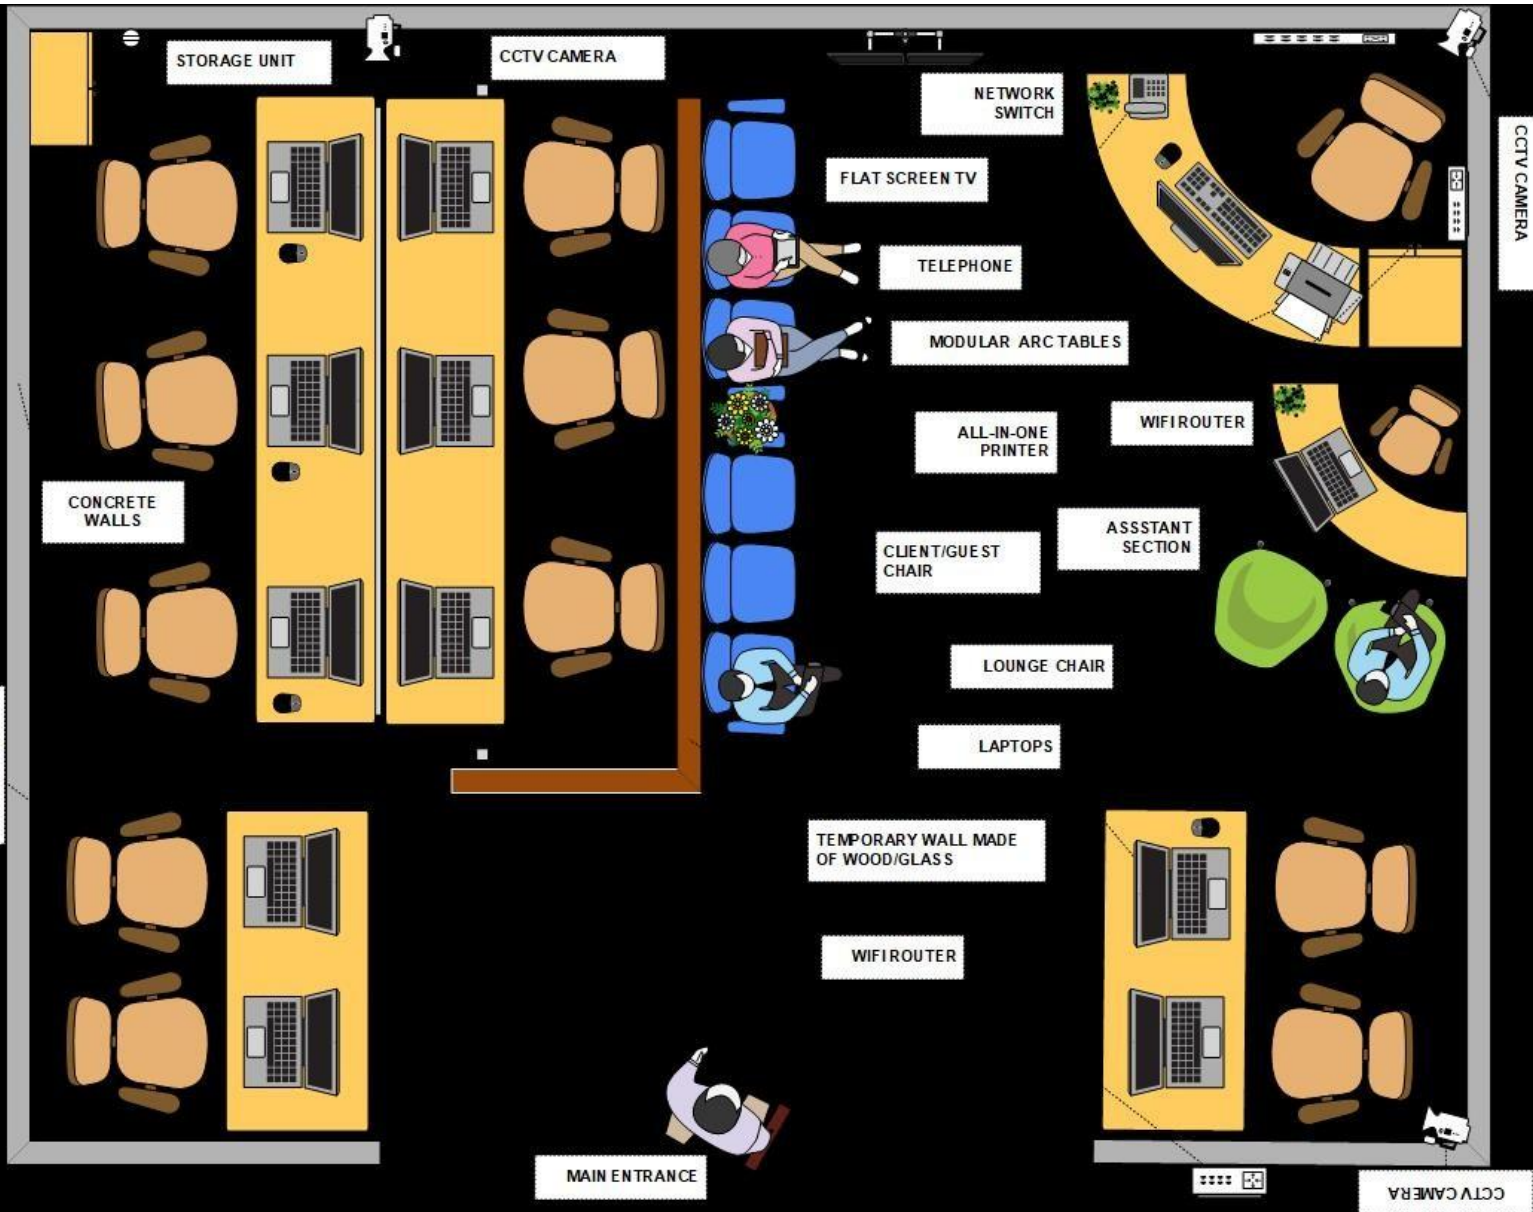

With utmost respect, the INCVIT FOUNDATION take this opportunity to thank you for the great work you do and may God bless you abundantly, the foundation kindly requests a donation because there is a need to help the less privileged to acquire knowledge, skills and to add value towards developing technology, we believe if these less privileged kids, youth and adults are given a chance to learn, exercise and socialize they can be of great importance to the world and to the industry of technology. We take into account to value your interests in supporting the activities in this project.

If given this opportunity/donation, through this Centre we shall be able to promote and carry out our activities to different parts of Uganda. We have written to you to express our desire, passion and dream to change lives and to play a part towards developing technology, we just need a start. And if given a chance we promise never to disappoint you and we shall work hand in hand if need be at a professional level. Our country Uganda is considered the pearl of Africa, it's a low developed country with the youngest population in the world of about 77% of its population making it a fertile ground for IT developments and IT product consumption. As a foundation we preserve a high level of ethics characterized by integrity and honesty, hope our project will be considered and for any inquire please visit the website or Email below OR at mutumbarich@gmail.com OR vituganda@gmail.com . May God bless you
